SUBJECT

Third Quarter 2010 Status Report
ExxonMobil Former Jalk Fee Property
10607 Norwalk Boulevard
Santa Fe Springs, California
CRWQCB-LAR Case No. 0203; Site I.D. No. 1848000

Dr. Chang:

At the request of ExxonMobil Environmental Services (EMES), on behalf of ExxonMobil Production Company (ExxonMobil), Environmental Resolutions, Inc. (ERI) has prepared this *Third Quarter 2010 Status Report* (Status Report) for the above-referenced site. This report presents a summary of the activities completed during the third quarter 2010 and the activities planned for the fourth quarter 2010.

During the third quarter 2010, ERI submitted a *Response to CRWQCB-LAR Directive Letter* (Response) dated July 30, 2010, which provided additional background information on both the former Jalk Fee property as well as the adjacent Continental Heat Treating (CHT) facility to the south of the site. The Response concluded that, based on historical documents and past property use, the primary source of PCE and TCE on the Former Jalk Fee property was from the CHT facility, therefore additional assessment by ExxonMobil was not warranted.

In a letter dated August 24, 2010 the CRWQCB-LAR denied ExxonMobil's request to rescind the requirement for additional assessment, and issued an order requiring that a work plan be submitted to delineate the vertical and lateral extent of chlorinated solvents beneath the site.

During the fourth quarter 2010, ERI will conduct the annual groundwater monitoring event for the two onsite monitoring wells. Additionally, ERI will prepare and submit the required work plan by the specified due date. For any questions regarding this Status Report, please contact Mr. James Anderson at (805) 644-4157, extension 181805.

Sincerely,

Environmental Resolutions, Inc.
